

Job Ad

Ministry: Ministry of Transportation
Division: North Region, Geomatics Section
Position Title: GEOMATICS PLAN TECHNICIAN
Duration: 1 Permanent
Location: 3rd Floor, 615 South James Street, Thunder Bay, P7E 6P6, North Region
Compensation Group: OPSEU
Salary: \$982.16 - \$1,144.64 (MplusM) per week*
Position Status: Open
Job Code: 31512 - Data Processing Technician 7
Schedule: 3
Category: Information Technology
Job ID: 13463

Are you seeking a challenging career opportunity within a pro-active environment where you can utilize your excellent analytical abilities and communication skills? Put your technical knowledge in computer-aided drafting techniques to work for the Ministry of Transportation, where you will be an integral member of a progressive and professional team!

You will be responsible for editing, processing, preparing, and reviewing engineering, legal and Geographic Information Systems (GIS) deliverables for the planning, designing, construction, and operation of transportation facilities. Examples of deliverables include legal and engineering survey plans, digital terrain models and horizontal alignments; GIS theme maps, products and services; and digital images and photogrammetric plans. In addition, you will produce and maintain Engineering and title records and other map products using plans, deeds, as-constructed drawings, building and entrance permits, utility relocates, digital maps, relational databases, and other spatial data from ministry sources and outside agencies. You will also provide technical expertise and assistance to ministry staff and to consultants.

Qualifications: knowledge of and experience in the processing of engineering and legal surveys and in the manipulation of spatially referenced data in a geographical information system (GIS) environment, as well as the ability to interpret and apply survey principles, practices and standards, and related legislation, such as the Surveys Act, Registry Act, and Land Titles Act; skills and experience in computer-aided drafting techniques using survey and GIS-related software and databases, as well as demonstrated understanding of co-ordinate geometry, least squares adjustments and the use of map projections and datum to prepare geomatics generated products; analytical, decision making skills and judgement; communication skills to relate technical information to staff and clients, as well as effective teamwork skills to work in a team environment to resolve technical problems and deliver products and services within established time frames.

Posting Date: Friday, November 14, 2008

Closing Date: Friday, December 05, 2008

Applications must be received by the end of the closing date with the Job ID number quoted.
